About Me:
Hi I'm Tomer Cohen, a motivated and experienced professional with a background in command in the Israel Defense Forces, where I served for two fulfilling years. During my service, I had the privilege of leading teams and making critical decisions in high-pressure environments, which helped me develop strong leadership, decision-making, and problem-solving skills.

Education:
I recently completed a year-long full development course at iNT College - Institute for Innovation and Technology. Throughout the course, I gained proficiency in various technologies, including Nest, NodeJS, MongoDB, React, TypeScript, and SQL. Additionally, I honed my teamwork skills and learned the importance of punctuality and delivering results through practical projects in the high-tech industry.

Experience:
Apart from my military experience, I also had the opportunity to intern at a startup, where I contributed to the development of the Lamed Li website, designed for teachers and students in Israel. Working with a diverse team in a fast-paced startup environment strengthened my ability to collaborate effectively with others and deliver exceptional results.

Skills:
My technical expertise lies in full development, with proficiency in Nest, NodeJS, MongoDB, React, TypeScript, and SQL. Moreover, my command experience in the Israel Defense Forces has instilled in me invaluable leadership and decision-making capabilities, which I further enhanced while managing teams and projects successfully during my full development course and army service. Additionally, I pride myself on having strong social and interpersonal skills, effective communication, teamwork, and relationship building abilities. My attention to detail and commitment to meeting deadlines are traits that have served me well in all my endeavors.

Career Goals:
Looking ahead, my ultimate career aspiration is to advance to a senior position or take on the role of a product manager. I am driven by the motivation to contribute to the advancement of technology for the betterment of humanity.

Availability:
I am open to relocation for the right job opportunity and can provide more details upon request.

I'm excited about the prospect of finding a challenging role in project management, software development, or product management, where I can leverage my leadership skills, technical expertise, and passion for leveraging technology for the benefit of humanity. If you have any questions or wish to connect further, feel free to reach out to me. Thank you for taking the time to learn about me!
